VICE PRESIDENT TAKEN OUT BY N.A.S.A.

October 6, 2017

WASHINGTON, D.C. (FNN)¹

While giving a speech last night in which he called for the United States to return astronauts to the moon, Vice President Pence was killed instantly by the Space Shuttle Enterprise.

NASA officials said that they had intended only to very slowly roll the shuttle behind the Vice President as a prop to augment his speech.

"We wanted to surprise him with how quickly we can respond when a wonderful moondoggle such as this is backed by a high-level spokesman for the Administration. We were almost literally over the moon at his remarks. I guess we got a bit overly enthusiastic," NASA Administrator-Designate Jim Bridenstine said today.

Former White House Advisor and Conspiracist Stephen K. Bannon wrote on the Breitbart website: "It's not NASA being overly-enthusiastic here. It's well-known that the Democratic elite have it in for Jim Bridenstine, and it's all just on account of

his dismissing the science behind so-called climate change. They're threatening to withhold their votes when Jim's confirmation hearings begin. We have learned that Hillary Clinton engineered this devastating tragedy. It's well-known that Hillary used to watch Jackie Gleason's 'The Honeymooners' on TV. She was particularly fond of Gleason's character, Ralph Kramden threatening his wife, Alice, with 'One of these days, Alice: Pow! On the moon!' (See photo top right) *The Gleason*

Effect is also well-known to NASA, as the photo of an astronaut's discovery on the moon illustrates. Finally, you can plainly see that the lead photo of the event used by the biased, fake news, mainstream press has been doctored. The actual, unretouched photo (above right) clearly shows Hillary at the controls." Others dispute Bannon. "Even as late as 2001, the Fox television Net-
